

How can you help someone who is having an

asthma attack

Key action:

Help them
to use their
inhaler

How do you know someone's having an asthma attack?

They may find breathing difficult.

They may make a wheezing sound.

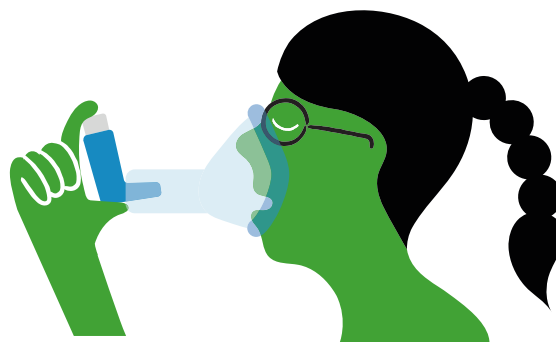

They may cough a lot.

Their lips may turn blue.

How to help

- 1 Help the person to sit down and rest.
- 2 Tell them not to worry, and that you are going to help them.
- 3 Help them to use their inhaler.

- 4 Tell an adult.
